WORK EXPERIENCE

Oracle NetSuite   Jun 2025 – Present

Associate Software Engineer

- Maintain the NetSuite codebase, an enterprise resource planning (ERP) software that serves as Oracle NetSuite's core product.
- Manage United States (US) Payroll compliance and resolve customer issues via Jira's ticketing system.
- Utilize agile methodologies, CI/CD, and quality assurance within a high-performing Scrum team.

Timefree   Jul 2023 – Sept 2023

Mobile Developer Intern

- Created professional-grade wireframes and mock-ups in Figma for a mobile application.
- Developed screens using React Native and Expo, implementing features like dark mode and navigation.
- Managed version control via Git, contributing 24% of total commits to the project.

FEATURED WORK

Portfolio – Personal site showcasing stories, skills, and deep-dives into various engineering projects.

Mirage – Svelte-based web application for showcasing personal top Spotify tracks with customizable dynamic backgrounds.

ELBeds – Flutter-based web application designed to help users find accommodations in Los Baños, Laguna. Served as the front-end team lead, overseeing development, user interface design, and user experience design.

AR Graphix – Swift/iOS app using ARKit and SceneKit to supplement foundational computer graphics lessons via interactive AR.

Visualisort – Swift-based iOS 16+ application that provides step-by-step visual sorting algorithm demonstrations.

An Orbital Overture – Web application utilizing WebGL for planetary rendering on canvas.
